Welcome to our latest catalogue

Please spare a few moments to read some of the following information regarding ordering and dealing with Martins as we feel that this will help us to get your needs met promptly and accurately.

We have a hardworking and committed team who believe that only by providing you, the customer with great products, excellent service and fair prices can we all prosper.

If you have a question or special request, call us and we will try to accommodate your needs.

Birmingham Chamber
of Commerce and Industry

Placing orders

You can place orders by phone, fax, email or directly via our website. We can accept payments by cheque in Pounds, Euros and US Dollars along with all major credit and debit cards.

We also offer monthly credit accounts subject to references.

Our office hours are 8am to 5pm Monday to Thursday and 8am to 1pm Fridays.

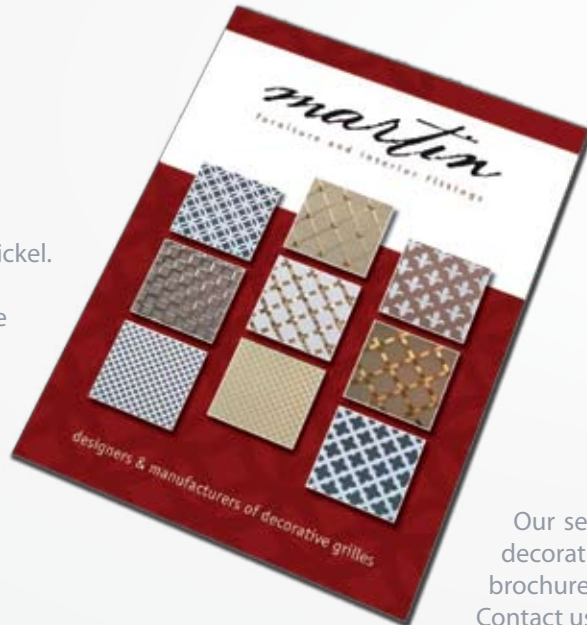

Bespoke Manufacturing

The major strength of Martin being a member of the Armac Group is that it gives us the necessary skills and production capabilities to meet any requirements you might have. There is a wealth of knowledge and skills throughout the Group, which enables us to solve manufacturing problems and to produce components from designers' drawings and plans.

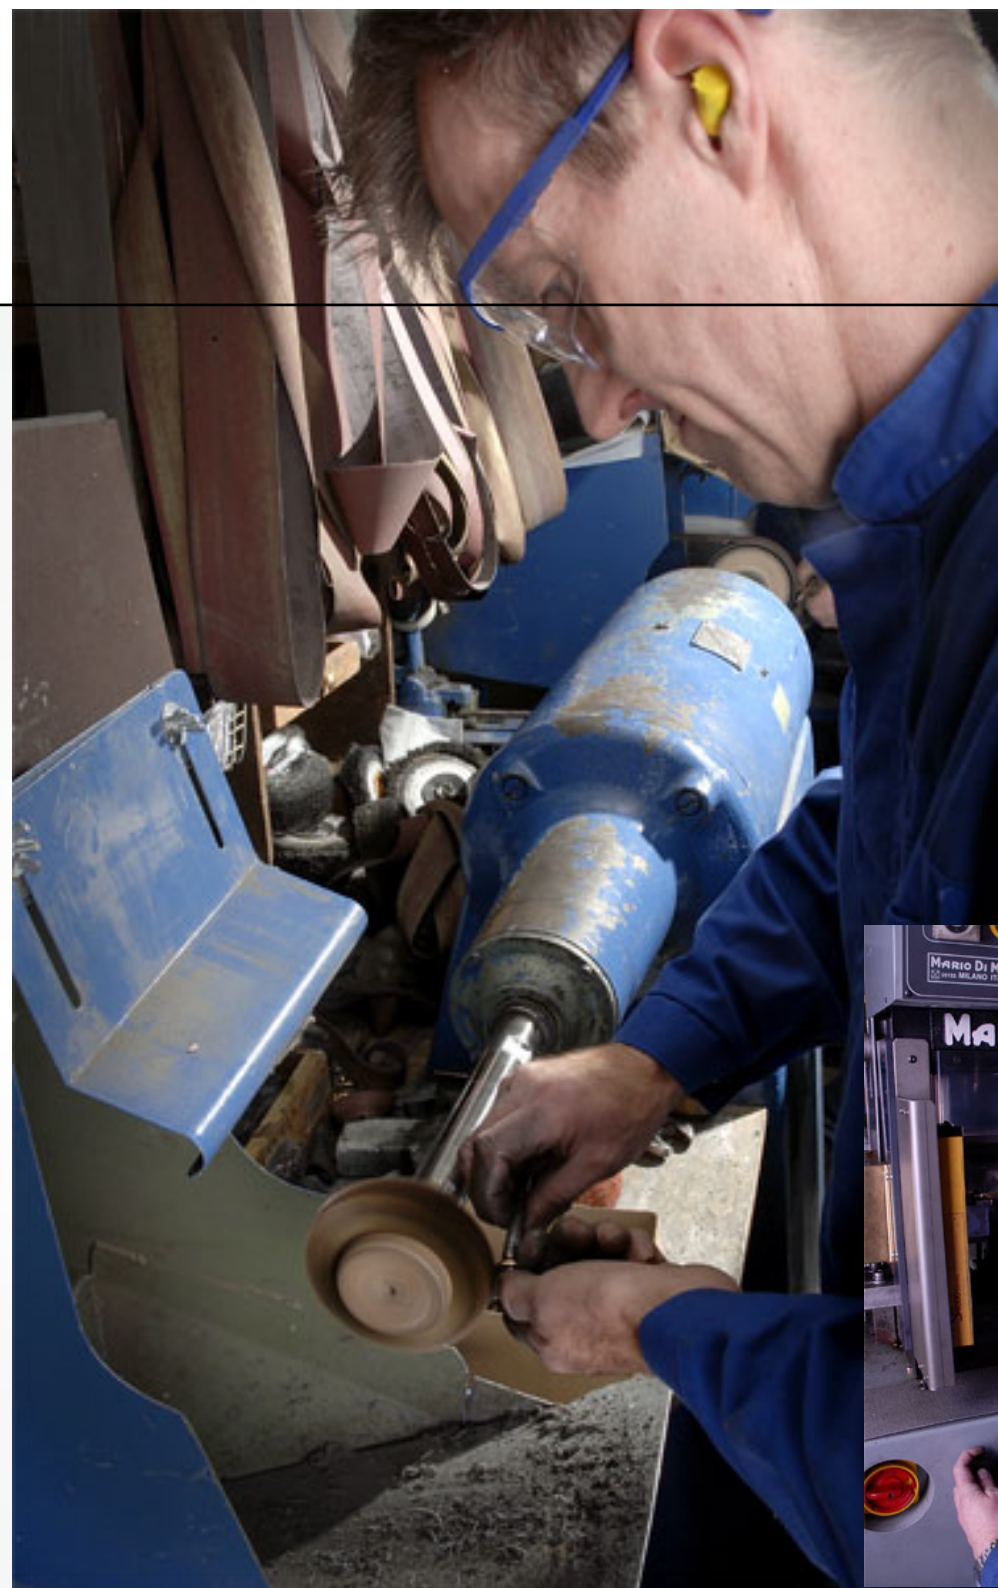

At home in the Armac Brassworks factory we have the skills and experience available to provide brass manufacturing of the highest quality. We have our own brass presswork facility, we do our own brazing work, we can hand finish and polish all manner of brass components, and within our CNC engineering division we have invested over £1 million pounds in the very latest CNC turning and milling machines to enable us to produce complex components in-house. In addition to our own skills we are perfectly placed in Birmingham to source components and services from other local businesses which can provide us with;

- brass forging
- hot brass stamping
- brass pressure die-casting
- gravity casting
- sand casting
- lost-wax
- fine casting
- electro plating in Chrome and Nickel.

The list is endless, and you may be pleasantly surprised to find that unlike some of our overseas competition quantities don't necessarily need to be sky high and fill a container!

Our separate 64 page decorative grille colour brochure. Contact us for your copy.

We can produce one-off replacement parts, we can manage 10's or 20's for special projects, we major in the 100, 500, 1,000 batches, and are well set up to comfortably produce in the 10,000 unit arena if required to do so.

In recent times we have developed many exclusive items for key kitchen manufacturers both in the UK and in the USA, we work as production partners for some very high end lighting companies, we work with specialised boat builders, we provide parts for cooker and range manufacturers, we provide restoration assistance on English Heritage projects, and can supply a bolt for your garden gate!

In addition, we can provide laser etching to add logos and names to handles and knobs to provide branding and exclusivity to the finished product, be it a kitchen or contract furniture piece.

We also have a pattern vault crammed with old designs and patterns which we recourse to when we are looking for something a bit different to launch or to meet a specific enquiry from a furniture designer.

We have old catalogues and display boards that show all these products and we have in the past allowed furniture designers to browse through all the boxes of handles, plates, rings, drops and escutcheons. This helps them to finalise their designs and we can then begin to get prototypes made up for sample pieces of furniture.

We have our own designers and pattern makers so if you only have a rough idea of what you want to produce, we can work with you. Taking your ideas and rough sketches and working together producing what you had in mind.

Our aim is to make the Armac Group your first thought whenever you have a new product enquiry or building project that needs development.

ARTS & CRAFTS

Arts & Crafts furniture fittings are very popular as we launch this catalogue in 2008 and there are many mass-produced versions on the market. However we believe that our range is pure Arts & Crafts because so much of it is hand-made and hand finished. It is solid and functional, yet beautiful and decorative.

William Morris, a founder of the Arts & Crafts Movement, once said "try to get the most from your material, but always in such a way as to honour it most".

We believe that we have done exactly that.

KNOBS

Modern simple design knobs suitable for kitchens and bathrooms in chrome and nickel plated finishes sit comfortably alongside classic reproduction antique knobs from the Sheraton and Chippendale periods.

The majority of these knobs utilize an M4 rear-fixing 30mm or 40mm length machine screw, but the smaller knobs can have the traditional woodscrew face-fixings, and we still offer the original bolt & nut fixings to special order.

PULL HANDLES

This section of the catalogue ranges from the ornate Victorian drawer pull handles through the Art Deco and Art Nouveau periods and into the 1950's with many of the Dresser Pulls.

Many are face fixing pulls and finish coordinating woodscrews are included, whilst some have the more simplistic rear-fixing method. All can be bought in nickels and chromes to suit modern kitchen styles or in the traditional antique or polished brass for solid wooden furniture and cabinets.

ARCHITECTURAL PULL AND APPLIANCE HANDLES

A range of solid cast and turned brass handles combining timeless beauty with rear fixed strength.

Traditionally used for the more discerning domestic and commercial building refurbishments and new build but also increasingly specified as appliance pulls for the Kitchen manufacturing markets, particularly in the U.S.A.

1 Pull Handle, Art Deco Style rear bolt fix

5 Forged Brass Traditional Pull Handle (also available rear fix)

Code	Overall Length
H1435	254mm

This is a new range of European handles, pulls, and knobs designed with the modern kitchen in mind. The sleek lines and minimalist look give this range a high-tech, contemporary feel. Made from pressure die-cast brass and mazak they are finished to an excellent quality, making this an exciting addition to the Martin range of kitchen fittings.

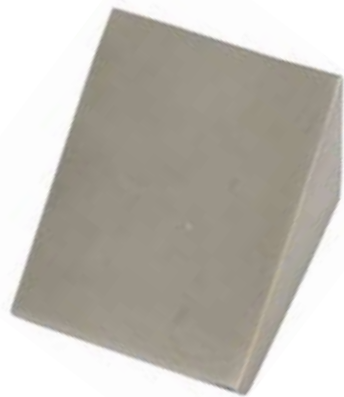

Finishes are the standard chrome and nickel, both polished and satin as well as a special shot-blast aluminium look, we call 'DULL'. Fitted to the right furniture however, these handles and knobs are anything but dull!

This began life as the Gothic range and was later afforded the title Hockley after another district of Birmingham synonymous with the Jewellery trade.

Whilst we wouldn't be so bold to claim this as a gem of our own making, it is a very interesting and unusual range of fittings.

Intriguingly the handles are fitted directly into the rosettes, rather than have several parts that can be fiddly and time consuming. The rosettes are fixed from the rear and once finished in either satin brass (shown on 6805) or very dark antique (particularly gothic looking) really make a statement on a kitchen or living room. This entire range is made as sand cast brass.

SWAROVSKI® ELEMENTS

A range of sparkling handles as unique as they are striking.

Combining Italian design flair with genuine CRYSTALLIZED™ SWAROVSKI ELEMENTS, this collection of knobs and pull handles add an extra dimension to the Martin range of interior fittings. Fitted onto high gloss laminate drawer fronts and cupboards these handles will create a hugely bright and impressive reflection on all who are captured by their light.

There are 5 different shapes to these knobs and handles. Each is available with either a square or a triangular inlaid crystal detail.

A comprehensive availability of finishes is offered: Special Old Colour, Iron Look, Polished Chrome, Polished Nickel, Matt Nickel, Black Nickel, Gold Plated, Antique Silver.

These are some terrific designs that we have brought together as Art Deco. Fabulous zig-zag designs, Aztec themes, bold geometric patterns, all classic elements of original Art Deco style. However we believe that many more products in the catalogue have Deco influences.

Look at the Aston Cross and Warstone, some of the Edwardian handles and the Hexagon Suite.

All of these are sand-cast and hand-made in solid brass except products 13-15, which are made as heavy stamped plates.

They epitomize the fluid natural styling of Art Nouveau and when fitted to the plainest sideboard or chest of drawers can transform the furniture into a feature piece for the home.

Like Art Deco, Art Nouveau is still not a mainstream style for furniture production but to achieve that element of individuality and to certainly catch the eye these handles are ideal.

ASTON CROSS

This range was designed in-house and has already been used by quality furniture manufacturers on dining and living room ranges that clearly have an Art Deco or Arts & Crafts feel to them.

Each design is available in 3 sizes to make the range one of the most comprehensive in our catalogue, and therefore suitable for all sizes of furniture production.

Incidentally the name is taken from the area of Birmingham where the original Armac factory was located back in the 1930's, and the 'Aston Cross' is portrayed by the slotted design element on the backplates. All backplates are stamped brass, and the rings and pulls are brass formed.

WARSTONE

This is the companion range to the Aston Cross and is named after another traditional area of Birmingham still within a stones throw of our current home in Duddeston.

The range is in effect the same design as the Aston Cross only without the four cross slots on the backplates. This gives it a more solid look and whilst it is still Art Deco in its styling it does have a more contemporary feel, particularly when used in the Satin Nickel finish. The other standard finish being Satin Brass as illustrated.

All backplates are stamped brass, and the rings and pulls are brass formed.

MISSION

The Mission range is designed with Shaker style furniture in mind. Shaker is a hugely popular style for kitchens and has been since probably the mid 1990's.

The ethos of Shaker furniture is very similar to that of the Arts & crafts movement. Hand-made product that was functional but of a good quality so that it would last.

The hammered effect version in this range is very symbolic of the way handles and rings would have been made and looks stunning in the Antique or satin finishes.

The plain (un-hammered) version is very striking in either polished brass or polished chrome and nickel and looks fabulous on darker woods.

This range was developed from the 2920 cabinet handle, which is a traditional reproduction antique fitting dating back to the early 19th Century. We were intrigued by the geometric design of the backplate and the flat surfaces of the grip and we sought to expand on that using modern hexagon brass bar turned into drops and pulls.

The result is this excellent and very unique range of handles that has its origin firmly rooted in the past but with the application of design and the use of modern finishes such as Satin Nickel creates a very strikingly modern contemporary suite of furniture or kitchen fittings.

CABINET HANDLES

These handles are really at the heart of Armac's core business.

We are manufacturers of traditional reproduction antique brass cabinet fittings, and these, probably more than any other range in the catalogue, perfectly illustrate that fact.

Manufactured in a variety of methods from sand-castings to forgings and turned parts they are finished to look old and grace any antique cabinet or reproduction piece. Still supplied in the traditional way with separate grips, pommels, threads and nuts and available as standard in the Armac antique finish.

Note: All sizes in this range are ctc - centre to centre

EDWARDIAN HANDLES

This extensive range of ornate design plate handles and matching pedestal or wardrobe handles was re-introduced by Bryan McGrail, the son of the founder, back in the 1980's. At the time these were widely used to re-vamp plain Victorian chests and the increasingly popular pine chests and pine bedroom furniture.

This is still the practice today and more so these handles are finding their way to genuine Edwardian furniture via the antique restorers. Some have Art Deco elements, many have Art Nouveau influences but all are quite distinctly Edwardian. All are manufactured as stamped brass backplates with forged or sand cast grips

OVAL PLATE HANDLES

Another classic Armac stock-in-trade range of furniture handles. It is important to note that these handles were always made as cold brass stampings. That was how they came into being and the tools and patterns we use today are the original patterns acquired from Pearson, Page and Jewsbury when we bought their business back in the early 1960's. In truth this is but a small fraction of the many patterns we have available to us.

These are the most popular designs and as well as providing that Hepplewhite look for an old desk or drawer table, they also work as an excellent 'cover-all' replacement handle. The size and shape of the plate enables the restorer to cover up a multitude of old drill holes and past plate markings very successfully. All are manufactured as stamped brass backplates with forged brass grips.

Most of these vertical fitted handles are made as companion products to the plate handles in the previous section of the catalogue, or the cabinet handles from pg 31. Hence we use many of the same numbers such as 1512, 1509, 1701 1685.

The smaller pedestal handles are surface mounted with the use of brass pins or small woodscrews. The larger wardrobe handles are made to operate cabinet locks and latches so have a 5mm square spindle on the back that will pass through the lock (see page 103 pattern No. 878). Many can also be specially ordered with a cupboard turn to secure a cupboard door without the need of a lock or latch.

PLATE HANDLES

Here we have a fabulous range of plain, fretted and engraved plate handles. All widely used in the antique reproduction furniture industry as well as the furniture restoration trade. These pages are full of classic designs with the periods covered being mainly the 17th and 18th centuries.

We have Chinese influence Chippendale designs, classic Sheraton fittings, and neo-classical styles from Robert Adams and William Kent.

Still supplied in the traditional way with separate grips, pommels, threads and nuts and available as standard in the Armac antique finish.

RING HANDLES

The majority of this section is from the 18th century with neo-classical designs and Georgian period pieces that are widely used on reproduction antique furniture production and restoration.

However, alongside these are many more contemporary styles that when supplied in plated finishes can look excellent on modern living furniture such as Hi-fi cabinets and kitchen drawers.

The majority of these handles use a stamped brass backplate with solid formed rings on a hook spindle with steel nut.

DROP HANDLES

Many of these designs are from the early 18th century and are typical of the type of handles used on furniture from the William & Mary period, whilst some date back to the Restoration period beginning in the 1660's.

The 1738 Dutch drop is a classic example of this, and is still greatly used on reproduction antique desks, bureaus, and escritoire writing tables. Several of the teardrops are brass stampings and are hollow or cavity backed. This is how they were originally made (as a means of reducing the metal content at a time when brass was nearly as expensive as it is today!) We have continued to use the original press tools in our manufacturing process to make these as authentic as possible. Almost all drops are attached to a brass hook spindle and secured inside the drawer or cupboard using a steel nut.

Many of these escutcheons are intended to work with plate handles and cabinet handles on traditional reproduction antique furniture and antique restoration pieces. Alongside the escutcheons we also show a few paterae decorations and bed-bolt covers. The majority are brass stampings made from original press tools, although some are still made as the original sand castings.

As standard these products are supplied in the Armac antique finish, but polished brass or plated finishes can be supplied to special order.

MILITARY & MARINE FITTINGS

The Napoleonic Wars created their own style of furniture that became known as Military or Campaign furniture.

Designed to make maximum use of the storage space in the hold of a ship when transported overseas, it is block-like in shape and often constructed in separate easily moveable sections.

Where possible the handles were flush fitted and the corners and edges were protected with brass covers.

HOOKS

We show here a range of hooks that serve many purposes.

The cabin hooks are still used today in boats but serve very well as external gate hooks or for holding back garden patio doors.

The wardrobe and coat hooks can be used under the stairs or on the backs of doors or inside wardrobes. They could be chrome plated and fitted in bathrooms for robes or towels or they could be mounted splendidly on an antique hat stand in the entrance hall.

BRACKETS & SHELVING

Another diverse selection that covers bracketry from the small bookcase shelf supports and tonk strip to the large handrail and rope rail brackets. Most of these items are sand-cast and hand finished at our factory in Birmingham, but we also offer, here for the first time, some beautifully machined glass shelf brackets that look stunning in polished brass or chrome plated.

With the strip and studs we also provide all that you will need to fit out a bookcase, or create some light shelving in cupboards or CD cabinets.

This is a new range for the catalogue but the patterns have been ours for a great many years. They are made from solid sand-cast brass and the majority of them will bear some considerable weight.

Whilst a good number of these may end up below ground they also look splendid when used to great effect on large chests and blanket boxes.

CARDFRAMES

Whilst this is only a small range, the 0788 is available in 3 sizes and as such will meet most requirements of a solid brass cast cardframe. The smaller pulls are beautifully made and the larger pulls are fabulous when finished and fitted.

Our standard finish for all of these is polished brass but they look equally as good in polished chrome or satin nickel.

A wide variety of styles and shapes as depicted.

Available in standard, reverse etching and multicoloured.

Standard e.g. - Meehan, Flintoff
 Reverse e.g. - Coryndon
 Multicoloured e.g. - Posse

Fixing methods either holes to suit pin fixing or easy peel self adhesive backed.

Minimum order quantity is usually 250 and will be subject to Artwork charges.

Delivery is normally 4 weeks from drawing approval.

Personalise your furniture products with your own exclusively designed logo labels.

Available in brass, aluminium, stainless steel or plastic in a wide variety of styles and shapes as depicted. They can be either blind etched, etched and filled or printed in a choice of colours. Available as pin fixing or easy peel self adhesive back.

The most popular styles are illustrated here. Contact our sales who can advise on options to suit your company. Normal minimum order is 250 off (to include artwork charges) although we have produced smaller quantities. Delivery is usually no more than 4 weeks from drawing approval.

CATCHES & TABLE FITTINGS

This is another section that has been expanded since the previous catalogue was available. Most of the original pieces in this range are speciality fittings for tables.

Flip-top table fittings such as the 0902 or the 0885, or the loose leaf, extendable table fittings 1756 or 2006. The 0907 secretaire catch dates back to the beginning of the 19th century. To these items we have added some excellent hand-made cupboard catches that have proved to be very popular with the kitchen industry.

4 LM5203

5 LM5402

6 LM5601

7 LEL01/2

Easy Installation (LEL01/2 only)

Installed by screwing a plastic housing onto the frame; then the decorative metal cover is clipped in place. All fixings are hidden, leaving a clean finish

Silent Closure (LEL01/2 only)

Unlike conventional magnetic catches there is no need for the catch to close directly onto a counter plate. The unique design will tolerate a small gap, which allows silent closure. This enables the introduction of a buffer system between catch and stile, providing a quiet but positive close.

CASTORS

There is no range of fittings in this catalogue of which we are more proud.

The Armac castors are traditional in manufacture and application. They are expertly made and tested to be strong enough for all modern requirements.

They look stunning on heavy upholstered furniture or large ornate dining tables. Most of the styles date back to the 18th century and the squat versions 1342, 938 were popular in the Regency period. Brass wheels were popular until the Victorians decided to use white china porcelain wheels and later the Edwardians favoured the brown wheels, which are still very popular today. We have supplemented the Armac range with several castors designed for hardwood flooring. We have nylon wheels or wheels that hold a rubber tyre that should not mark or indent the wooden floorboards.

Armac have always provided this small selection of items specifically intended for the restoration of grandfather clocks.

Whilst many of these items sell well we are kept equally busy by clock restorers requesting replica parts to be made using our lost-wax casting service.

HINGES

A range of traditional design, surface mounted, cabinet hinges. The classic H-hinge, the ornate Snake hinge, the fancy Butterfly hinge, and the tiny Box hinge sit alongside the very popular butt hinges.

In addition to the cabinet hinges we also have the card table hinge that opens to 180 degrees, and the secretaire hinge that opens to 90 degrees, as well as a delightful clock case hinge and some quadrant style box hinges.

DOOR KNOCKERS

Armac have always made and sold door knockers but they have never featured in the main catalogue until now. All are solid sand-cast brass made at our own foundry and each one is finished and assembled by hand.

Like the escutcheon pages, this is only a small selection of the full range of patterns available, but we hope we have selected enough that should appeal to most people. Our entire door knocker range is hand made from sand castings at the Armac Brassworks.

Ornamental Mouldings, Gallery & Strip

A selection of brass malleable mouldings, embellishments, decorative strip and brass gallery railings.

The mouldings are Antique Brass, and sold in 1 metre lengths. The strip and gallery are self colour brass, and the ornaments are lightweight pressings that need to be secured with a brass pin.

These are essential items for the restoration and renovation of ornate furniture.

LOCKS

Every new catalogue has seen the expansion of our lock section and this edition is no exception. Additions for most of our popular locks are often requested extra sizes and a greater variety of pin distances (of great benefit to restorers). The jewel box lock and bureau lock are also of particular interest to specialist box and furniture manufacturers.

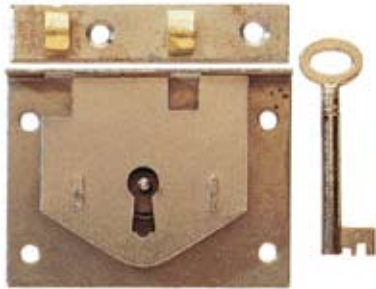

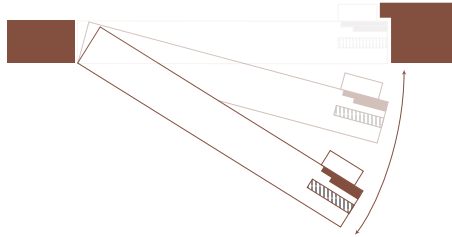

Opening Cupboard Doors

Lock showing left hand position. The diagram illustrates the hand of locks fitted in the cut, rim or mortice position. Bolt shoots to left when locked.

Opening Cupboard Doors

Lock showing right hand position. The diagram illustrates the hand of locks fitted in the cut, rim or mortice position. Bolt shoots to right when locked.

BOLTS

Here we offer a splendid range of solid brass furniture and barrel bolts. All are produced from original tooling in our own factory in Birmingham. Each bolt is quality checked to ensure a neat smooth action and a superior finish, even the barrel bolts are hand polished! The rivetting, the springs used, the finish, and the action of the bolt itself make these an excellent range of quality products.

The bolts shown here cover a range of applications for internal cupboards or wardrobes to surface mounted decorative fittings. All are supplied with quality woodscrews and striking plates.

4 H500

General Information

Fixing Screws.

Wood screws of a matching finish are included with all of our surface mounted products. All other products are supplied complete with fastenings.

Please note that traditional furniture knobs are supplied either as (R/f) rear-fix with an M4 x 40mm machine screw or as a (W/s) woodscrew fixing with an M4 wood-metal dowel.

The traditional method of bolt & nut fixing is still available to special order.

Non Standard Items.

We would also welcome enquiries for special items of brass hardware outside of our normal cabinet range. We have at our disposal a complete facility for the manufacture of components and finished products in brass, bronze, steel, and aluminium.

Errors and Improvements.

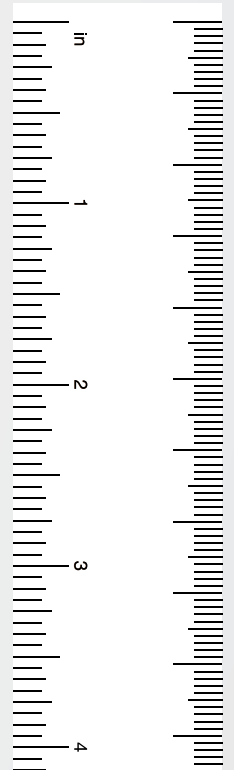

We reserve the right to modify designs and dimensions for reason of design or manufacturing improvement. Every care has been taken to ensure the accuracy of information in this brochure; we cannot accept responsibility for errors or omissions.

Units of Measure.

As the majority of the Armac range is reproduction antique fittings, and the patterns we used can be over 100 years old, it should be no surprise that the original measurements were Imperial. Armac have stayed true to the original sizes and specifications rather than try to adapt to 'more practical' sizing. Hence we still have 3.3/8" and 2.7/8" etc.

For the purpose of the catalogue we have decided to show the products with a metric measurement as this is now more universally the standard. We couldn't let the old imperial sizes disappear altogether though so the conversion is listed here for the purists (of which we like to include ourselves).

mm	inches	mm	inches	mm	inches
9mm	3/8"	60mm	2 3/8"	140mm	5 1/2"
13mm	1/2"	64mm	2 1/2"	146mm	5 3/4"
16mm	5/8"	70mm	2 3/4"	150mm	5 7/8"
19mm	3/4"	76mm	3"	152mm	6"
25mm	1"	82mm	3 1/4"	166mm	6 1/2"
28mm	1 1/8"	86mm	3 3/8"	178mm	7"
32mm	1 1/4"	89mm	3 1/2"	191mm	7 1/2"
34mm	1 5/16"	92mm	3 5/8"	203mm	8"
35mm	1 3/8"	95mm	3 3/4"	210mm	8 1/4"
38mm	1 1/2"	98mm	3 7/8"	229mm	9"
41mm	1 5/8"	102mm	4"	254mm	10"
45mm	1 3/4"	105mm	4 1/8"	266mm	10 1/2"
48mm	1 7/8"	108mm	4 1/4"	279mm	11"
51mm	2"	115mm	4 1/2"	292mm	11 1/2"
54mm	2 1/8"	121mm	4 3/4"	305mm	12"
57mm	2 1/4"	127mm	5"	327mm	12 1/2"

Finishes

Antique and Polished Brass (ANT, POL) are the two original finishes of the Armac business and many items are still stocked and sold in this way. The Armac antique is quite like no-other, it can vary in shade and relief, and will tone down and patinate beautifully over time once fitted to the furniture. It is often copied but never equalled. The Polished Brass is always lacquered unless requested otherwise, and a highly durable Stove Lacquer is used that, unless wiped with kitchen cleaners or bleaches will probably outlast the furniture! More recently we have added Nickel and Chromium plating to several of the ranges both in the polished finish and a more brushed satin effect (PCP, PNP, SCP, SNP). Other finishes unique to Armac are the Old English Brass (OEB) and the Special Old Colour (SOC).

In addition to these 'standards' we are prepared to try and achieve any look you desire, and if it can be done to brass then we can do it! Gold plate, Black Gold, Silver Plate, or Antique Silver. Black Chrome or Dull Nickel. Light Antique, Dark Antique, Matt Antique, Matt Brass, Sanded Brass, Satin Brass, American Bronze, Rose Gold... The list goes on....

ANT – Antique Brass

MATT ANT – Matt Antique Brass

PNP – Polished Nickel plate

PCP – Polished Chrome Plate

ASP – Antique Silver Plate

SCP – Satin Chrome Plate

SOC – Special Old Colour

SAT – Satin Brass

OEB – Old English Brass

POL – Polished Brass

SNP – Satin Nickel Plate

Conditions and terms of trading

1. General

All tenders and quotations are submitted and all orders accepted solely upon and subject to the following terms and conditions to the exclusion of all other terms and conditions except such (if any) as are specifically accepted by the company in writing. Acceptance of delivery shall be conclusive of acceptance of these terms and conditions.

2. Quotations

Quotations are submitted on the understanding that goods supplied will be liability invoiced at prices ruling at the date of despatch unless otherwise agreed.

3. Delivery Promises

These are given in good faith and will be adhered to, as far as possible, but no liability will be accepted for subsequent unforeseen delays. Goods offered ex-stock are subject to their being unsold on receipt of confirmation.

4. Cancellation and Variations

- (1) Cancellation of an order cannot be accepted, or goods returned for credit, unless previously agreed in writing by the company.
- (2) No variation of any order shall be binding upon the company unless the same shall be agreed in writing.
- (3) Stock items returned by agreement with the company shall be subject to a re-stocking charge.

5. Loss or Damage in Transit

Where goods are sent carriage paid the company will replace free of charge goods damaged or lost in transit provided that written notification is given to the company within three days of delivery or in case of total non-delivery notice is given to the carriers and the company within seven days of the date of notice of despatch.

6. Inspection

The customer shall inspect the goods immediately on arrival thereof and shall note shortages or damages on the delivery note and given written notice to the delivery, with full details of their claim, within seven days from such arrival. If the customer should fail to give such notice within the said period the goods shall be deemed to be in all respects in accordance with the contract and the customer shall be bound to accept and pay for them accordingly.

7. Retention Of Title

- (1) Risk in the goods shall pass to the customer immediately on delivery to the customer or into custody on the customer's behalf whichever is the sooner.
- (2) Notwithstanding delivery, the goods shall remain the property of the company (which reserves the right to dispose of this contract) until the company has received payment of the full price of (a) all goods the subject and (b) all other goods supplied by the company to the customer under any other contract whatsoever.

(3) The customer shall nevertheless be entitled to deal with the goods in the ordinary course of business provided that:

- (a) The customer shall not purport to dispose of property in the goods until delivery to its own customer.
- (b) The customer shall first dispose of the goods that it has paid for and any payments received by the company from the customer shall first be appropriated to goods disposed of by the company.
- (c) If the goods are altered or any goods become attached to the goods or if any part of the goods is replaced, such other goods or replacement parts shall accede to and form part of the goods and such attachment or replacement shall not affect the company's property in the goods.
- (4) Until the property in the goods passes to the customer the customer shall hold the goods as bailee for the company and shall store the goods in such a way that they are readily identifiable as the property of the company.
- (5) If payment of the price or any part of it under this or any other contract is overdue or if the customer is in breach of any contractual term of this, or any other contract with the company or if a receiver is appointed overall up or becomes bankrupt, then without notice:
 - (a) All sums payable by the customer to the company under this or any other contract shall become immediately due and payable.
 - (b) The customer shall cease to be entitled to sell, use in manufacture or otherwise deal with the goods.
 - (c) The company shall be entitled to recover and resell the goods (without prejudice to its right to damages) and for that purpose the customer hereby irrevocably grants the company its servants or agents a licence to enter upon the customer's premises for the purpose of removing the goods.
 - (d) The company shall be entitled to stop all further deliveries of goods to the customer under this or any other contract.
 - (e) If any of the forgoing provisions shall be invalid or unenforceable such invalidity or unenforceability shall not affect the remaining provisions.

8. Payment (Credit cards only)

Strictly Nett – Payment within one month following month of invoice.

9. Specification

In accordance with our policy of constant improvement we reserve the right to modify or amend without notice the specification of any of our products.

10. Liability

- (1) The company's liability whether in respect of one claim or in the aggregate arising out of any contract shall not exceed the purchase price payable under the contract
- (2) Except as specifically provided in these conditions, no liability is accepted for any direct or indirect costs, damages or expenses relating to damage to property or injury or loss to any person firm or company or for any loss of profits or production arising out of or occasioned by any defect in or failure of goods or materials or parts thereof supplied by the company.

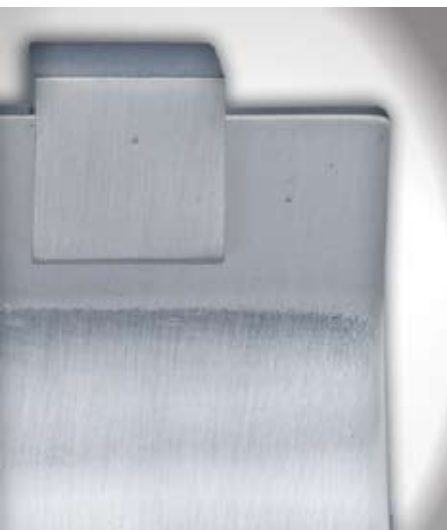

11. Force Majeure

The company shall be under no liability for any delay, loss or damage caused wholly or in part by the Act of God, Governmental restriction condition or control or by reason of any act done or not done pursuant to a trade dispute whether such dispute involves the company's employees or not or by reason of any other act matter or thing beyond the reasonable control of the company.

12. Law Applicable

All contracts are deemed to be entered into England and shall be governed and constructed in accordance with English Law.
